

Hello,

We wondered if you are going to gamescom this year and would be interested in getting hands-on time with an exclusive close-to-release version of our tactical tower defense game MarZ Rising?

* You can see the latest trailer of MarZ Rising [here](#).

You can also try the game with this Steam Code: XXXXX-XXXXX-XXXXX

MarZ Rising is a tactical tower defense game about fighting against hordes of space zombies as you build, manage, defend and strategically adapt your martian base and launched into Early Access last September.

Since then the game has seen regular updates, including the massive [“The Rising” update](#) that will launch on 20th July. For gamescom we will bring a new version of the game for the first time that has the new skirmish mode, a level editor and other tweaks and therefore includes most of the features of the full version of the game that we plan to launch later this year.

We would be very happy to welcome you at our booth in hall 4.1, stand number D-030g/E-039g (21.-23. August). You can find more info about MarZ Rising [here](#).

If we should set up an appointment or you have questions, of course just let me know.

Greetings from Vienna,
Miriam Egli
